Pune, India | +91 9075341967 | snehprasad07@gmail.com | [LinkedIn](#) | github.com/spsneh07 | [LeetCode](#) | [Portfolio](#)

EDUCATION

SRM Institute of Science and Technology

B.Tech, Computer Science & Engineering (AI & ML)

CGPA: 8.92

Chennai, India

May 2024 – May 2028

TECHNICAL SKILLS

AI/ML: Machine Learning, Deep Learning, Scikit-learn, TensorFlow, Keras, NumPy, Pandas

Languages: C++, Java, Python, JavaScript, TypeScript

Web Development: React, Next.js, Node.js, Express.js

Databases & Cloud: MySQL, MongoDB, Microsoft Azure (DP-900 Certified)

Developer Tools: Git, GitHub, Postman, VS Code, Jupyter Notebook

Core CS: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, REST APIs

EXPERIENCE

AI & Machine Learning Intern

May 2026 – July 2026

Centre for Development of Advanced Computing (C-DAC)

Pune, India

- Applied core ML/DL concepts – regression, classification, ensemble learning, and neural network optimization – via hands-on implementation using Python, Scikit-learn, TensorFlow, Pandas, NumPy, and Matplotlib
- Contributed to an end-to-end RUL prediction pipeline on the NASA C-MAPSS turbofan dataset under mentorship, applying ML/DL model benchmarking to real sensor data

Full Stack Developer Intern

May 2025 – July 2025

Vital Skills, in collaboration with Tech Kriti, IIT Kanpur

Remote

- Developed responsive React interfaces for core workflows – authentication, onboarding, dashboard, task management/assignment, workspace management, and profiles – integrating REST APIs with the backend team

PROJECTS

Aircraft Engine Predictive Maintenance (ML & DL) | *Python, Scikit-learn, TensorFlow, Keras*

- Engineered sensor-data preprocessing and feature extraction from multivariate NASA C-MAPSS data (Pandas, NumPy, Matplotlib) for RUL modeling
- Implemented and benchmarked seven ML/DL architectures (Linear Regression, Random Forest, ANN, CNN, RNN, LSTM, GRU); selected GRU as the best model

Bearing Fault Classification | *Python, Scikit-learn, TensorFlow, NumPy, Pandas, Matplotlib*

- Preprocessed raw vibration signals and engineered statistical time-domain features (RMS, kurtosis, skewness, crest factor) from a multi-condition bearing dataset spanning four fault types
- Developed and comparatively evaluated multiple ML/DL architectures for fault classification via accuracy, precision, recall, and F1 to guide model selection

Modern Banking Application | *React, Next.js, TypeScript, MySQL*

- Engineered a full-stack banking application in Next.js/TypeScript with JWT authentication and RBAC; designed a MySQL schema and REST APIs for account and transfer operations

CERTIFICATIONS

Microsoft Certified: Azure Data Fundamentals (DP-900) • Full-Stack Web Dev Bootcamp (Udemy) •

Generative AI Foundations (upGrad) • NPTEL: Java, OOP, DBMS
